Letter of Recommendation for Shubham Tiwari

Dear Sir or Madam,

I have known Shubham Tiwari since supervising his master's thesis in the winter semester 2024/2025, entitled *"Exploring Hyperparameter Optimization for Enhancing the Privacy-Utility Trade-off for the Synthetization of Tabular Data."* During his thesis, he demonstrated a strong understanding of deep learning and machine learning concepts, while also showing the ability to apply these methods effectively in practice. His thesis produced strong results with clear scientific value and publication potential. Based on the findings of his master's thesis, we prepared a paper that has been submitted to the ISCB GMDS 2026 (*Joint annual conference of the International Society for Clinical Biostatistics and the German Association for Medical Informatics, Biometry and Epidemiology*). Mr. Tiwari's master's thesis was awarded the highest possible grade (1.0), in the German grading system.

In general, I was impressed by Mr. Tiwari's committed and positive attitude. Throughout his master's thesis, he showed a high level of motivation, which was clearly reflected in the quality of his results. He worked very independently and consistently approached his tasks in a scientifically manner. Finally, I would like to emphasize that Mr. Tiwari was always very pleasant, attentive, and professional in personal interactions. I therefore recommend him without reservation.

Sincerely,

M.Sc. Martin Kuhn
